NOTICE

As we welcome the winter season, the University recognizes that shorter daylight hours can impact the daily routines and mobility of the students. In the ongoing effort to enhance the academic experience of the students, the University is implementing a change to the University schedule.

Effective Nov 4' 2024, the University academic hours for the students will be from 9:15 am to 3:15 pm until the completion of the current semester. This adjustment is designed to provide the students with more daylight during their commutes and classes, ultimately fostering a more conducive learning environment.

The University priority is to support the success and well-being throughout the academic journey of a student.

A proforma time table is depicted below for better understanding.
