

Message from the Associate Dean (R&D) Desk

Welcome to the Research and Development Cell of ICFAI University, Sikkim. In today's knowledge-driven world, research stands not only as a cornerstone of academic excellence but also as a transformative force shaping sustainable societies, informed policies, and innovative industries. As the Associate Dean of Research & Development, I am proud to lead a university-wide commitment to fostering a culture of critical inquiry, ethical scholarship, and collaborative knowledge creation.

At ICFAI University, Sikkim, our research pursuits are not confined to theoretical frameworks—they are inspired by real-world challenges and guided by a sense of social responsibility. We actively encourage interdisciplinary research, blending insights from management, law, IT, and social sciences, in alignment with the goals of the National Education Policy (NEP) 2020 and the United Nations Sustainable Development Goals (SDGs).

Through the R&D Cell, we aim to provide faculty, research scholars, and students with a robust ecosystem that supports idea incubation, research design, funding facilitation, and impactful dissemination. Our structured initiatives such as research clusters, faculty development programs, and collaborative projects with industry and academia are designed to empower innovation and academic contribution at all levels.

We also emphasize the importance of research integrity and publication ethics, ensuring that our scholars contribute meaningfully and responsibly to the global body of knowledge.

As an active researcher, academician, and editor, I have always believed that research is not just about publishing papers—it is about creating change, influencing thought, and inspiring the next generation of scholars. I invite all stakeholders—students, faculty, institutions, and collaborators—to join us in this journey of inquiry, excellence, and impact.

Let us research with purpose, publish with integrity, and lead with vision.

Dr. Vivek Kumar Pathak

Associate Dean (R&D)
